CAREER OBJECTIVE

B.Tech graduate in Computer Science (AI & ML), Brainware University, 2026. Over the past year I have worked on Bengali NLP data pipelines, audio processing and transcription workflows, and RAG-based chatbot development during my internship at Shabd Intelligence. I enjoy building things that work with real data – whether that is cleaning and structuring a language corpus, automating a multi-stage audio pipeline, or shipping a web application. Looking for a data engineering or AI/ML engineering role where I can keep doing hands-on technical work.

EDUCATION

Brainware University

B.Tech in Computer Science & Engineering – AI & ML | CGPA: 8.55/10

Kolkata, West Bengal

Aug 2022 – Jun 2026

Mandalkuli Netaji Vidyapith

Higher Secondary (12th) | Percentage: 77%

Bankura, West Bengal

2021

EXPERIENCE

Data Engineer Intern

IITM Research Park, Chennai (Remote)

Shabd Intelligence Pvt. Ltd.

Apr 2026 – Present

- Built a Bengali dictionary pipeline using Python scripts – scraped and extracted words from multiple sources, cleaned profanity and invalid entries, and structured the final word list for downstream NLP tasks.
- Processed voice data using label files to identify speaker segments; used Shabd and Whisper APIs for transcription, then broke output into word-level tokens for dataset preparation.
- Developed Bengali grammar rules in Python and applied them for word-level and sentence-level correction tasks on raw text data.
- Built a multi-stage audio processing pipeline covering segmentation (splitting audio by speaker activity, removing noise and silence), transcription (converting speech to Bengali text), and translation (Bengali to English) – all automated end-to-end using Python.
- Contributed to a team project building an AI Bengali Tutor chatbot using voice input/output (Shabd API), RAG over prior audio-derived data, and an LLM for answer generation.
- Performed data analysis across pipeline stages – tracking progress, extracting metadata, and preparing reports on data quality and processing status.

PROJECTS

Hostel Expense Tracker | *Python, Flask, HTML, CSS, JavaScript*

[GitHub](#)

- Built a web app for hostel residents and travellers to split and track shared expenses, create rooms, add members, and manage budgets.
- Implemented expense splitting logic and automated email reports to all members of a room summarising their share of expenses.
- Flask backend with HTML/CSS/JS frontend; includes room creation, member management, budget tracking, and report generation.

Smart Coding Assistant | *Python, LangChain, FAISS, Streamlit, Gemini 2.5 Flash, RAG*

[GitHub](#)

- Built a RAG-based AI coding agent to help students prepare for technical interviews using custom DSA resources.
- Engineered a document ingestion pipeline using FAISS vector embeddings and implemented a multi-tool LangChain agent with Gemini 2.5 Flash for dynamic query routing between the knowledge base and live web search.
- Designed a Streamlit conversational UI with session state memory for multi-turn interactions.

Walmart Sales Data Analysis | *Python, Pandas, MySQL, SQLAlchemy, SQL*

[GitHub](#)

- Extracted and cleaned a 10,000+ record retail sales dataset via the Kaggle API; built a data ingestion pipeline using SQLAlchemy and PyMySQL into a structured MySQL database.
- Authored 8+ advanced SQL queries using Window Functions, subqueries, and datetime extractions to analyse branch performance, profitability, and shift-based sales patterns.

AI-Powered Video Analytics with OpenVINO | *Python, YOLOv8, OpenVINO, Flask, WebSocket*

[GitHub](#)

- Developed a real-time retail analytics system using YOLOv8 for person detection and centroid-based tracking to measure unique visitor footfall.
- Integrated OpenVINO emotion-recognition model for CPU-optimized facial emotion classification; built a Flask + WebSocket dashboard for live streaming and visitor monitoring.

TECHNICAL SKILLS

Programming: Python, SQL (MySQL), JavaScript, C

Data Engineering & NLP: Data Pipelines, Text Cleaning, Audio Segmentation, ASR (Whisper, Shabd API), Transcription, Translation Pipelines, Bengali NLP, Metadata Extraction, SQLAlchemy, PyMySQL, Pandas, NumPy

AI & ML: LangChain, RAG, FAISS, Gemini API, YOLOv8, OpenVINO, Scikit-Learn, Supervised Learning

Web & Backend: Flask, HTML, CSS, REST API Integration, Streamlit

Tools: Git, GitHub, Docker, VS Code, Jupyter Notebook

Soft Skills: Analytical Thinking, Problem Solving, Written & Verbal Communication, Team Collaboration

TRAINING & CERTIFICATIONS

Industrial Training – Intel Unnati Program (Remote) <i>Six-Week Training on AI Systems & Data-Driven Applications</i>	Feb 2025 – Apr 2025
Workshop on Emerging Trends in AI & ML <i>5-Day Industry Workshop</i>	Aug 2024
IBM SkillsBuild – Getting Started with Artificial Intelligence <i>Issued Aug 2025</i>	

LANGUAGES

English: Read, Write, Speak **Hindi:** Speak **Bengali:** Read, Write, Speak
